

Splitter MAX

Power any device via PoE

Have an older device that doesn't support PoE? Use the Splitter MAX to **split your PoE connection into two separate power and data ports.**

The industrial-grade Splitter MAX is designed with **durability** in mind. Operate your device efficiently with guaranteed performance in tough conditions across a **wide temperature range.**

-40°C to +70°C
-40°F to +158°F

DC Power Out

Data Out

PoE IN

The Splitter MAX offers **galvanically isolated power and Ethernet lines**, protecting your network against electrical noise and enhancing performance.

Surge Protection

The Splitter MAX's integrated surge protection provides advanced shielding against power surges, ensuring the safety and reliability of connected devices in hazardous electrical environments.

Compact Form Factor

The Splitter MAX's small size allows it to fit in tight spaces for more versatile installations.

Compatible Devices

Splitter MAX is compatible with any device that operates from 12V and consumes **less than 48W**.

Solution for Antenna MAX

While some Peplink routers do not support Power over Ethernet (PoE) input, **Splitter MAX** can be used to provide power to these devices.

*It effectively isolates surges when assembled with the Peplink Antenna Max.

Specification

PoE Input	802.3bt 48W (802.3af/at compatible)	Product Dimensions	102 x 50 x 26.5mm 4.01 x 1.96 x 1.04inch
DC Output	12V, 48W	Enclosure Material	Metal
Efficiency	88-91%	Operating Temperature	-40°C to +70°C -40°F to +158°F
Surge Protection	Surge/lightning protection for the Ethernet port (PoE In port)	Certification	FCC/IC/CE/ROHS/REACH IEC 61000-4-5 Surge (Level 4) IEC 61000-4-2 ESD (Level4)
Ethernet Interface	10/100/1000/2500M Ethernet	Input and Output Galvanic Isolation	Power and Etherent
Weight	142g / 0.313lb	Package Contents	Splitter MAX DC cable (100mm)

Ordering Information

Product Code	Description
